

PANDUGA MANOJ KUMAR

Full-Stack Web Developer

+917993149379 pandugamanoj9@gmail.com LinkedIn GitHub Hyderabad, India

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with experience in full-stack web development using React.js, Next.js, Node.js, Express.js, and Firebase. Skilled in building RESTful APIs, JWT authentication, and responsive web applications. Built projects in real-time communication, AI-based platforms, and event management systems with role-based access control. Currently seeking a Full-Stack Web Development Internship.

EDUCATION

Anurag University | Hyderabad, India
B.Tech in Computer Science and Engineering

Aug 2024 - Aug 2028
CGPA : 8.57/10

PROJECTS

CurrHub | GitHub Live Demo
Full Stack Developer

Feb 2026 - Mar 2026

- Built an AI-powered learning-path generation platform using FastAPI with Gemini and GPT-4o-mini APIs, **orchestrating** an AI-driven API pipeline to generate structured learning paths.
 - Designed a **prompt orchestration system with structured JSON outputs**, improving response consistency by 30%.
 - Engineered a Mermaid.js-based visualization engine to render 15+ node dynamic learning graphs per curriculum.
 - Deployed scalable backend on Render handling 100+ concurrent API requests during testing with stable performance.
- Technologies/Tools Used** : Python, FastAPI, Google Gemini, OpenAI API, JavaScript, Render

Convera | GitHub Live Demo
Full-Stack Developer

Jan 2026 - Feb 2026

- Built a real-time chat application using Firebase Firestore with Google OAuth 2.0 authentication in an **event-driven architecture**.
 - Implemented a **real-time synchronization system using Firestore listeners**, enabling message delivery under 300ms without polling.
 - Optimized database schema using indexing and denormalization, reducing query latency by approximately 40%.
 - Improved responsive UI performance to ensure seamless cross-device real-time synchronization under concurrent user activity.
- Technologies/Tools Used** : JavaScript (ES6), HTML5, CSS3, Firebase

EventSync | GitHub Live Demo
Full Stack Developer

Nov 2025 - Dec 2025

- Architected an event management platform using Next.js, React, and Firebase with secure authentication and **role-based access control (RBAC) architecture**.
 - Designed a **weighted scoring engine for volunteer-task assignment**, improving allocation efficiency by 25%.
 - Implemented real-time analytics dashboards using Recharts to track registration, attendance, and event performance metrics.
 - Enforced Firestore-based access control system ensuring secure multi-role operations for organizers and participants.
- Technologies/Tools Used** : Next.js, React, TypeScript, Firebase, Firestore, Recharts

SKILLS

Programming Languages :	JavaScript, Python, Java, C
Frameworks & Libraries :	React.js, Next.js, Tailwind CSS, Node.js, Express.js
Databases :	MongoDB, Firebase, Supabase
Tools :	Git, GitHub, VS Code, Vercel, Render
Core CS Concepts :	Data Structures & Algorithms
Languages :	English, Hindi, Telugu

ACHIEVEMENTS

- Secured **Top 10 position in InnoQuest 2.0**, a college-level hackathon.
- Participated in over **8 hackathons**, building full-stack web applications and prototypes under time constraints.
- Completed **NPTEL certification in Java Programming with a score of 88%**.
